ABOUT ME

AI & ML postgraduate with hands-on experience in Python, Machine Learning, Deep Learning, and Computer Vision. Skilled in developing AI-driven applications using tools such as YOLOv8, OpenCV, and Streamlit, with practical experience in building and deploying intelligent solutions. Strong problem-solving and technical support background with a focus on applying AI to real-world problems.

WORK EXPERIENCE

Technical Support Executive

Srvisif AI Pvt. Ltd.
May 2023 – May 2024

- Monitored AI-powered CCTV and surveillance systems.
- Troubleshot technical issues related to AI cameras and monitoring systems.
- Assisted clients with system-related issues and provided technical support.
- Coordinated with clients during deployments, updates, and issue resolution.
- Monitored system performance and escalated technical issues when required.

Academic Mentor / Counselor

Edutree Consultancy.
May 2026 – September 2026

- Guided students on technology and postgraduate programs based on their academic backgrounds and career goals.
- Communicated complex course and program information clearly to prospective students.
- Managed leads and maintained structured records using CRM tools.

EDUCATION

Master of Science in Artificial Intelligence

2024 - 2026

Saintgits College of Applied Science, Mahatma Gandhi University, Kottayam

Bachelor of Science in Electronics

2020 - 2023

Relevant coursework in Basic Electronics, Microcontrollers and applications, Opto-electronics

SKILLS

Programming: Python, R, Java, C++
Libraries: Pandas, NumPy, Scikit-learn, OpenCV, TensorFlow
ML & AI: Regression, Classification, YOLOv8, Model Evaluation
Soft Skills: Problem-Solving & Critical Thinking, Time Management, Communication

CERTIFICATIONS & ACHIEVEMENTS

- Workshop on “Full Stack Development”
- Certificate of “Introduction to Data Analysis” by meta on coursera.
- HACKATHON Participation: Galactic Problem Solver at the 2024 NASA International Space Apps Challenge(Oct 5 -6 ,2024)

PROJECT EXPERIENCE

Smart Daycare Monitoring System

Developed a real-time AI monitoring application using YOLOv8 for object detection and DeepFace for emotion recognition, with automated alerts, attendance tracking, danger-zone detection, and reporting.

Counsel AI

Developing an AI-assisted application that matches students with suitable courses based on their academic qualifications, provides course recommendations, and supports EMI calculation and lead management. Built using Python, data processing, and AI-based tools.

AI Diet Chart Recommendation System

Developed an AI-based application that recommends personalized diet plans based on user inputs such as age, weight, fitness goals, and dietary preferences. Implemented data processing and recommendation logic using Python and machine learning techniques.

AI Travel Agent

Developed an AI-powered travel planning agent that generates personalized travel itineraries based on user preferences such as destination, budget, duration, and activities. Implemented intelligent recommendation and planning logic to simplify trip planning.
